About this guide

WHAT is this guide used for?

This guide includes context and step-by-step 'how to's' about the **D365 F&O: AR Collections Overpayment and Write-Off Restoration process**. It has been developed as the primary on-the-job reference to support WTG team members responsible for completing D365 F&O system tasks.

HOW to navigate this guide?

This guide is made up of Parts and Topics. A Part represents a collection of related topics (e.g., a set of related procedures). A Topic represents a specific item of information related to the Part. Each Part and Topic can be accessed from the Table of Contents.

Part 1: What do I need to know?

This part provides an overview of the end-to-end business process covered in this document. It outlines the purpose, scope, and context of the process within the broader functional stream, and introduces key roles, systems, and activities involved.

Part 2: How do I do it?

This part contains detailed steps on completing specific tasks in the D365 system. The instructions used in this guided approach are split into two main (2) sections:

- Action: section one (1) of the information table; one individual action per row, beginning with an italicized verb.
- Description: section two (2) of the information table; location, exact values, context, expected results and relevant notes.

Note: Part 1 and Part 2 will be consistent across all D365 Procedure Guides (PGs). PGs may include additional Parts covering major topics related to the specific module / PG.

Hyperlinks

Hyperlinks are used throughout this document. *Click* on a hyperlink to directly navigate to another topic in this guide, or to an external resource.

Key

The table below defines what colors are used to highlight specific sections in this document:

Color	Definition
	Highlight an off-system action
	Highlights the start / end of a step.
	Highlights the end of the process.

Part 1: What do I need to know? (AR Collections Overpayment and Write-Off Restoration)

High-level process

Part Description

This guide explains how to put an amount back on a customer account with a **Customer payment journal** (CPJL), including a written-off amount that needs to be reinstated. The journal has one line: a credit on the customer account, with the Overpayment ledger as the offset. Moving funds between customer accounts is covered by the AR Collections Customer Account Transfers guide.

When a write-off should be reversed or cancelled instead of restored, approval, and correcting or reversing a posted journal are outside the scope of this guide until confirmed.

Initiation

- An overpayment or a written-off amount must be put back on a customer account.

Stream

Stream	Process Area	Key Roles
Accounts Receivable	AR Collections	• To be confirmed

Process

The high-level process is as follows:

#	Action	Who	When	Where
1	Restore an Amount to a Customer Account	To be confirmed	When an overpayment or written-off amount must be put back on a customer account	D365

© 2026 WiseTech Global

Roles and responsibilities

Overview

The business role that prepares and posts this journal is not yet confirmed.

Tasks / Business Roles	To be confirmed
Restore an Amount to a Customer Account	R

*R = Responsible

Key concepts

Overview

Before you start, you need to know which journal and offset account a restoration uses, and which fields to leave as they are.

Restoration entry

Term	Description
Customer payment journal (CPJL)	The journal used to put a written-off or overpayment amount back on a customer account.
Credit to the customer	An amount being returned to the customer account is entered as a credit.
Overpayment ledger	The main account used as the offset for a restoration entry.

Before you post

Rule	Description
Use the original currency	The currency must match the original transaction.
Describe the entry	Use a clear description that includes the customer code, for example "Overpayment put back on customer account".
Leave unsupported fields blank	Do not enter financial tags, an invoice number or a bank account.
Keep pre-populated dimensions	Do not change the financial dimensions that fill in automatically.
Simulate before posting	Run Simulate Posting and resolve every error before you post.

Part 2: How do I do it? (AR Collections Overpayment and Write-Off Restoration)

1. Restore an Amount to a Customer Account

Description

Use this topic to put a written-off or overpayment amount back on a customer account. You create a CPJL journal with one credit line for the customer, offset to the Overpayment ledger, then run Simulate Posting and post.

Responsibility

- To be confirmed: prepares and posts the restoration journal.

Initiation

- An overpayment or a written-off amount must be put back on a customer account.

Topic Overview

This topic includes these steps:

Step	Description
Create the Restoration Line	Create the CPJL and enter the customer credit with the Overpayment ledger offset. Output: the line is complete.
Validate and Post the Journal	Run Simulate Posting, correct errors and post. Output: the amount is back on the customer account.

1.1 Create the Restoration Line

Procedure

Complete these steps to create the restoration line:

Action	Description
PROCESS START	*Pre-requisites:* • Access to D365 and to **Customer payment journal**. • The customer account, amount and original currency. *Responsibility:* • To be confirmed
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Click* **Modules**.	From the left-hand **Navigation Pane**, click **Modules**.
3. *Navigate* to the **Customer payment journal** page.	From the **Navigation Pane**, *select*: • **Credit and collections >** • **Customer payment journal** You can also open **Customer payment journal** from your **Favorites** (see the AR Collections Favorites guide).
4. *Create* a new journal.	Start a new CPJL journal.
5. *Enter* the journal description.	Use a clear description that includes the customer code, for example "Overpayment put back on customer account".
6. *Open* the journal lines.	Open the lines of the new journal.
7. *Enter* the transaction date.	Use the current date, unless a valid prior-period date is required and the period is open.
8. *Select* the customer account.	Select the customer the amount is returned to. The name fills in automatically.
9. *Enter* the amount as a credit.	Enter the amount as a credit, in the currency of the original transaction.
10. *Enter* the line description.	Use the same description, so the entry shows in the customer's history.
11. *Leave* the other fields blank.	Do not enter financial tags, an invoice number or a bank account.
12. *Select* **Ledger** as the **Offset account type**.	Set the offset account type to **Ledger**.
13. *Select* the Overpayment ledger.	Search for and select the Overpayment ledger in the main account field.
14. *Keep* the dimensions.	Do not change the financial dimensions that fill in automatically.
15. *Complete* the line.	Tab through every field, so fields such as the voucher fill in.
STEP COMPLETE	• *The restoration line is complete.* • *Continue to Validate and Post the Journal*

© 2026 WiseTech Global

1.2 Validate and Post the Journal

Procedure

Complete these steps to validate and post the journal:

Action	Description
PROCESS START	*Pre-requisites:* • The restoration line is complete (see Create the Restoration Line). *Responsibility:* • To be confirmed
1. *Run* **Simulate Posting**.	Check the journal before posting. A blue result means the journal is ready to post.
2. *Correct* any errors.	If Simulate Posting shows an error, read it, correct the line it names and run Simulate Posting again. If you cannot resolve the error, log a request through the D365 issue form (see **Additional Resources**) before you post.
3. *Post* the journal.	Post only when the line is complete and Simulate Posting succeeds.
4. *Verify* the restoration.	Check that the amount appears with its description on the customer account.
PROCESS COMPLETE	*Outcomes:* • A CPJL is posted with a credit on the customer account and the Overpayment ledger as the offset. • The entry can be identified by its description in the customer's history.
