About this guide

© 2026 WiseTech Global

WHAT is this guide used for?

This guide includes context and step-by-step 'how to's' about the **D365 F&O: Collections process**. It has been developed as the primary on-the-job reference to support WTG team members responsible for completing D365 F&O system tasks.

HOW to navigate this guide?

This guide is made up of Parts and Topics. A Part represents a collection of related topics (e.g., a set of related procedures). A Topic represents a specific item of information related to the Part. Each Part and Topic can be accessed from the Table of Contents.

Part 1: What do I need to know?

This part provides an overview of the end-to-end business process covered in this document. It outlines the purpose, scope, and context of the process within the broader functional stream, and introduces key roles, systems, and activities involved.

Part 2: How do I do it?

This part contains detailed steps on completing specific tasks in the D365 system. The instructions used in this guided approach are split into two main (2) sections:

- **Action**: section one (1) of the information table, under the screenshot; summarized steps.
- **Description**: section two (2) of the information table, under the screenshot; long text descriptions, including context, callouts, and highlighting important information.

Note: Part 1 and Part 2 will be consistent across all D365 Procedure Guides (PGs). PGs may include additional Parts covering major topics related to the specific module / PG.

Hyperlinks

Hyperlinks are used throughout this document. *Click* on a hyperlink to directly navigate to another topic in this guide, or to an external resource.

Key

The table below defines what colors are used to highlight specific sections in this document:

Color	Definition
	Highlight an off-system action
	Highlights the start / end of a step.
	Highlights the end of the process.

Part 1: What do I need to know? (Collections)

High-level process

Overview

The **Collections process** manages overdue customer balances in D365. It covers customer ownership through Customer Pools and Collection Agent assignments, account monitoring, customer communication, and activity recording. The process supports timely follow-up and business cash flow, helps minimize bad debt exposure, and provides visibility of collection actions through D365 F&O.

At a high level, the **Collections process** follows these key stages:

1. **Send Customer Statement** – Statements are generated automatically on a scheduled basis. Generate and send ad hoc statements when requested or required for collections follow-up.
2. **Monitor Customer** – Review aged balances and previous activities to identify accounts requiring follow-up. Maintain customer contact, direct debit and eBanking details as required.
3. **Customer Pool and Collection Agent Configuration** – Create Customer Pools, validate membership and assign pools to Collection Agents to establish customer ownership and allocate collections workloads.
4. **Contact Customer** – Engage with customers by phone or email to discuss overdue invoices, confirm payment status or disputes, and agree on next steps.
5. **Record New Customer Activity** – Record collection interactions, outcomes and agreed actions in D365 F&O, and attach relevant supporting correspondence and documents.
6. **Action / Resolution** – Resend documents, issue collection letters, update customer status, or process approved debt write-offs as appropriate. Escalate disputes or arrange payment plans as required. Payment corrections are in 220 Customer Payments.
7. **Update & Close Customer Activity** – Update the activity record in D365 F&O with the outcome and close it once the issue is resolved and no further follow-up is required.

Initiation

The Collections process begins when **customer balances remain unpaid beyond agreed payment terms**, following system reports or automated reminders, or at the Group Billing & Credit Manager's request. Customer Pool and Collection Agent configuration is required when new customer groups, legal entities or team members need collections ownership, or existing pool criteria or assignments change.

Stream

Collections is part of the Order-to-Cash (O2C) stream:

Stream	Process area	Team
O2C	Collections	• Collections Officer, • Group Billing and Credit Manager

© 2026 WiseTech Global

Process

The high-level **Collections process** is as follows:

#	Action	Who	When	Where
1	Send Customer Statement (ad hoc)	Collections Officer	Ad hoc when required.	**D365 F&O**
2	Monitor Customer	Collections Officer	Following statement issues or weekly during debt review cycles.	**D365 F&O**
3	Customer Pool and Collection Agents	Group Billing and Credit Manager	When new pools or agents are required, or pool criteria or ownership assignments change.	**D365 F&O**
4	Contact Customer	Collections Officer	Upon identification of overdue or disputed balances.	Outlook / Other
5	Record New Customer Activity	Collections Officer	Immediately after customer contact or correspondence.	**D365 F&O**
6	Action / Resolution	Collections Officer, Group Billing and Credit Manager	As required following escalation, dispute, or collection outcome.	**D365 F&O** / Outlook
7	Update & Close Customer Activity	Collections Officer	Once the issue is resolved, payment received, or case closed.	**D365 F&O**

Note: The high-level process includes new D365 F&O, new non-D365 F&O, and existing (BAU) activities. This procedure guide does not include BAU procedures.

Roles and responsibilities

The following table sets out Collections roles and responsibilities:

Tasks / Business Roles	Collections Officer	Group Billing and Credit Manager
1. Send Customer Statement (ad hoc)	R	
2. Monitor Customer	R	
2.1 View Customer Aged Balances	R	
2.2 Review Customer Activity	R	
2.3 Update Customer Details	R	
2.4 Maintain Customer Direct Debit & eBanking Details	R	
2.5 Customer Pool and Collection Agent Configuration	R	
3. Customer Pool and Collection Agent Configuration	R	R
3.1 Create Customer Pools for Collections		R
3.2 Add a New Collections Agent		R
4. Contact Customer	R	
5. Record New Customer Activity	R	
6. Action / Resolution	R	
6.1 Send Individual Invoice to Customer	R	
6.2 Create & Send Collection Letter	R	
6.3 Change Customer Status (debt not resolved)	R	
6.4 Debt Write-off	R[1]	R[2]
7. Update & Close Customer Activity	R	

*R = Responsible

[1] The Collections Officer is responsible for sending a request (email) to the Group Billing and Credit Manager to write-off a debt.
[2] Once a write-off request has been approved, the Group Billing and Credit Manager is responsible for creating a write-off journal.

© 2026 WiseTech Global

Key concepts

Overview

This section includes key concepts related to **Collections**.

Collections Workflow

A customer's overdue balance is subject to follow-up and activity tracking in D365 F&O:

If...	Then...
The customer has overdue invoices within acceptable tolerance.	The Collections Officer will contact the customer to arrange payment and record the interaction in D365 F&O.
The customer is unresponsive or disputes the balance.	The issue will be escalated to the Group Billing & Credit Manager for review or resolution.
The customer debt is deemed uncollectible.	The Collections Officer will initiate a Debt Write-off request for approval and processing.
A payment has been applied incorrectly to a customer account.	The Collections Officer will transfer, settle, or unsettle transactions as required to correct the customer balance.

Collection Activities

Each collection action is recorded as a Customer Activity in D365 F&O:

Activity Type	Purpose
Action	Immediate follow-up, e.g., phone calls or reminders.
Appointment	Scheduling a future contact or meeting.
Event	Recording a general update or collection milestone.
Task	Internal reminders, e.g., follow-up next week.

Customer Activity Status

A customer account status identifies the state of a customer account:

Status	Description
Open	The activity is active and pending further action.
In Progress	The activity is being actioned (e.g., awaiting customer response).
Resolved	The issue has been addressed, or payment has been received.
Closed	The activity is complete, and no further follow-up is required.

© 2026 WiseTech Global

Invoice Due Reminder Automation

D365 F&O includes an automated Invoice Due Reminder email as part of the updated Credit Collections strategy. The reminder is sent five (5) days before an invoice is due, helping reduce overdue balances and manual follow-up. Specifications include:

- A new automated collection process ("Pre-due reminder – 5 days") that triggers when the invoice due date minus 5 days is reached.
- Only invoices that are **Open**, have a **balance > 0**, and are **not disputed** or on **collection hold** are included.
- The rule automatically sends an email using a designated email template.

This reminder forms part of the revised collections timeline:

Action	Timing
Pre-Due Reminder	5 days before invoice due date
1st Collection Letter	3 days after invoice due date
2nd Collection Letter	11 days after the invoice due date
3rd Collection Letter	18 days after the invoice due date

Exclusion from Credit Management

Specific customer accounts or individual transactions can be excluded from automated credit and collections processing activities, including;

- Collections letters, and
- Direct debit (DD) processing runs.

Customer or transactions excluded from credit management may not be included in automated collections follow-up or Direct Debit processing activities.

Customer Payment Management

Customer payments may require manual adjustment to ensure balances are correctly reflected. These corrections are in 220 Customer Payments (version 3.0):

Action	Timing
Settle Customer Accounts	Match customer payments against outstanding invoices. See 220 topic 2.3.
Unsettle Customer Accounts	Reverse an incorrect settlement. See 220 topic 3.1.
Transfer Open / Closed Payments	Move payments between customer accounts when allocated incorrectly. See 220 topic 3.3.
Bank Fee Write-off	Clear small residual balances caused by fees, FX differences, or minor variances. See 220 topic 3.6.

© 2026 WiseTech Global

Customer Contact Integration (CW1 ↔ D365 F&O)

Customer contact information is managed across both CargoWise (CW1) and D365 F&O with bi-directional integration ensuring that contact details used for invoicing, statements and collections activities remain consistent across both systems.

Contacts are typically created and primarily maintained in CW1, then synchronized to D366. However, updates can also occur in D365 with certain changes flowing back to CW1 depending on the field and configuration. In D365:

- Each contact detail, e.g., email, and/or phone, is stored as a separate record.
- One email and one phone number can be marked as Primary.
- Emails with Purpose = Business are used for:
    - Customer statements
    - Invoices
    - Collection letters

This integration is critical to the Collections process, as it ensures:

- Communications are sent to the correct recipient.
- Contact details remain accurate and up to date.
- Changes made during collections activities are reflected across systems.

High Level Integration Rules

Scenario	Source System	Integration Outcome	Collections Impact
Created contact in CW1	CW1 ↔ D365	**D365**: Contact details created as separate records (Email, CC, BCC Phone).	Contact available for statements, invoices, and collections.
Contact updated in CW1	CW1 ↔ D365	**D365**: Changes reflected; new details added	Ensure the latest contact info used for follow-ups.
Contact details deleted in CW1	CW1 ↔ D365	**D365**: Corresponding details removed in D365	Prevents outdated contact usage
Contact inactive / AR flag removed in CW1		**D365**: Entire contact removed in D365	Contact no longer used in collections communications.
Contact created in D365 (Business purpose)	D365 ↔ CW1	**CW1**: New AR contact created in CW1	Allows the collection team to add valid contacts.
Contact updated in D365	D365 ↔ CW1	**CW1**: Email / phone updates sync (name changes do not)	Maintains consistency across systems.
Email Purpose ≠ Business in D365	D365 ↔ CW1 ↔ D365	**D365**: AR flag removed → contact deleted	Contact excluded from all communications.
Primary flag changed in D365	D365 ↔ CW1	**CW1**: Official flag removed in CW1	Impacts main contact designation.
Email deleted in D365	D365 ↔ CW1 ↔ D365	**D365**: AR flag removed → contact fully removed.	Contact removed from collections usage.

Part 2: How do I do it? (Collections)

1. Send Customer Statement (ad hoc)

Description

Sending a **Customer Statement** in D365 F&O provides a summary of a customer's financial transactions and current outstanding balance for a defined period.

The statement includes key details such as invoices, payments, credits, and adjustments, helping customers reconcile their accounts, and enabling timely collection of overdue amounts.

Note: The Customer Statement will be sent out automatically on the 5th of each month. Only use this process to generate and send the Customer Statement on an ad hoc basis.

This ad hoc process allows the Collections Officer to generate and send statements on demand (outside the monthly bulk run) when requested by a customer or internal stakeholder.

Responsibility

Optional: The **Collections Officer** is responsible for generating and sending ad hoc customer statements in D365 F&O. While monthly statements are produced automatically in bulk, ad hoc statements may be sent at any time in response to customer requests or collection follow-ups.

Initiation

This process is initiated when:

- A customer requests a copy of their account statement; or
- A Collections Officer needs to provide updated balance information as part of customer contact or debt recovery actions.

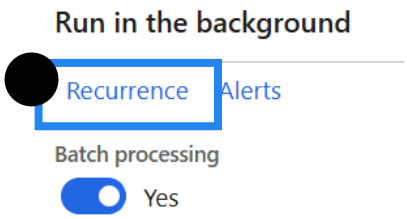

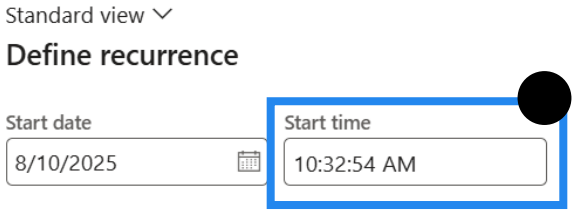

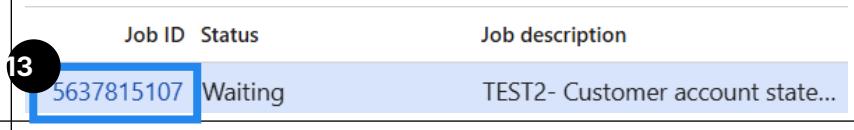

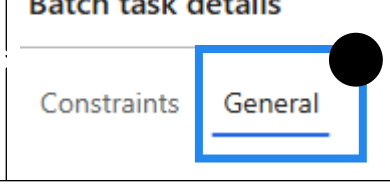

Procedure: Follow the steps on the next page to execute this task in-system.

© 2026 WiseTech Global

Procedure

Complete the steps below to Send Customer Statement (ad hoc):

<table>
<tr><th>Action</th><th>Description</th></tr>
<tr><td>PROCESS START</td><td>Pre-requisite:
The customer account must exist in D365 F&O, with posted transactions for the statement period and a valid recipient email address set to Purpose = Business.</td></tr>
<tr><td>1. Check the Entity.</td><td>Confirm you are signed into the correct Legal Entity (top-right).</td></tr>
<tr><td>2. Click Modules.</td><td>From the left-hand Navigation Pane, click Modules.</td></tr>
<tr><td>3. Navigate to the Customer Account Statement page.</td><td>From the Navigation Pane, select:
Modules >
Credit and collections >
Enquiries and reports >
Customers >
Customer account statement.
The Customer Account Statement form will appear.</td></tr>
<tr><td>4. Complete the required fields in the Customer Account Statement form.</td><td>Enter the required details:<table><tr><th>Field</th><th>What to do?</th></tr><tr><td>Use print management destination</td><td>Toggle to Yes.</td></tr><tr><td>Date interval</td><td>Select a relevant Date interval, e.g., Current year.
Note: Alternatively, select a ‘From date’ and/or ‘To date.’</td></tr><tr><td>Only open</td><td>Toggle to Yes.</td></tr><tr><td>Balance other than zero</td><td>Toggle to Yes.</td></tr><tr><td>Include company logo</td><td>Toggle to Yes.</td></tr></table>Note: select additional options as required.</td></tr>
<tr><td>5. Determine Customer Statement recipient.</td><td>If you want to generate a customer statement for a specific customer, update the Records to include section. If you want to generate for all, leave this section blank.<table><tr><th>If…</th><th>Then…</th></tr><tr><td>Sending to specific customers</td><td>Expand Records to include,
Click Filter,
Enter the Customer/s account into the Criteria field.</td></tr><tr><td>Sending to all customers</td><td>Leave the Records to include section blank</td></tr></table></td></tr>
<tr><td>6. Set Batch Processing to Yes.</td><td>Under Run in the background, set the Batch processing toggle switch to Yes. This will run the batch job in the background.</td></tr>
</table>

Action	Description
7. *Click* **Recurrence**.	Under **Run in the background**, *click* **Recurrence**. 
8. *Update* the **Start time** field.	**IMPORTANT: the Start time field needs to be set to a time in the future (recommended to be +1 hour).**  If this step is missed, the system will send multiple copies to the customer. This is step 1/2 to prevent this error.
9. *Click* **OK**	To set the selections.
10. *Populate* the **Task Description** field.	This field will auto-populate with the description '**Customer account statement**' – however, this can be updated to provide more information and make it easier to identify in the next step.
11. *Click* **OK**.	The batch job will be created. Due to setting a Start Time in the future, the Status of the Batch Job will be set to 'Waiting.'
12. *Navigate* to the **My batch jobs** page.	From the **Navigation Pane**, select: • **Modules** > • **Common** > • **Enquiries** > • **Batch jobs** > • **My batch jobs**.
13. *Select* the **Batch Job** created in step 2-10.	Locate the **Batch Job** you created in the previous step. Once it is located, *click* the **Job ID** hyperlink. 
14. *Click* **Edit**.	This will enable changes to be made to the **Batch Job**.
15. *Click* **Change Status** and set to **Withhold**.	You cannot change **Batch Jobs** unless it has a **Withhold** status.
16. *Navigate* to **Batch task details** > **General**.	*Scroll down* to the bottom of the page and *click* **Batch task details** > **General**, to update the **Maximum retries** field to zero (0). 

<table>
<tr><th>Action</th><th>Description</th></tr>
<tr><td>17. Update the Maximum retries field to zero (0).</td><td>IMPORTANT: Under Batch task details > General, update the Maximum retries field to zero (0).
If this step is missed, the customer statement will send multiple copies to the customer. This is step 2/2 to prevent this error.</td></tr>
<tr><td>18. Click Save.</td><td>The changes you have made to the Batch Job will be saved.</td></tr>
<tr><td>19. Click Change Status and set to Waiting.</td><td>After you have deleted the Maximum retries field, update the Status of the Batch Job back to Waiting.
Note: if you forget this step and the batch jobs remain in Withhold status, it will never process.</td></tr>
<tr><td>20. Click OK</td><td>To return to the Batch job page.</td></tr>
<tr><td>21. OPTIONAL:
Decide when to send the Customer Statement.</td><td>Decide when to send the Customer Statement by selecting from the options below:<table><tr><th>If...</th><th>Then...</th></tr><tr><td>You want to send the customer statement at the scheduled start date/time from step 8.</td><td>• No action – the system will automatically send the customer statement at the scheduled time.</td></tr><tr><td>You want to send the customer statement immediately.</td><td>• Update the Schedule Start Date/Time to the current time, or to a time in the past.
Note: This can be done from the My Batch Jobs page.</td></tr></table></td></tr>
<tr><td>PROCESS COMPLETE</td><td></td></tr>
</table>

© 2026 WiseTech Global

2. Monitor Customer

Description

Monitoring customers in D365 F&O enables the **Collections Officer** to proactively track overdue balances, review historical activities, and determine appropriate follow-up actions. This process ensures that all customer accounts are regularly assessed for outstanding amounts and recent interactions, supporting timely debt recovery and accurate account management.

The Collections Officer uses two key sub-processes to monitor customers effectively:

- **View Aged Balances** – to identify overdue invoices, verify recent updates, and analyze balances to determine the next step.
- **Review Customer Activity** – to access previous contact history, view notes, and confirm what actions have been taken to manage the account.

Together, these steps provide a complete view of the customer's financial position and interaction history, enabling informed and consistent collection decisions.

Responsibility

The **Collections Officer** is responsible for monitoring customer accounts daily in D365 F&O, ensuring that aged balances and activity records are reviewed and accurately maintained. They must identify overdue accounts requiring follow-up and ensure that all prior correspondence and actions are properly recorded before making new contact.

Initiation

This process is initiated as part of the **daily collection routine**, or when follow-up is required on specific overdue accounts.
It may also be triggered by:

- A scheduled collections review cycle; or
- Customer or internal queries regarding account status or previous collection activity.

Topic Overview

The **Monitor Customer topic** includes these steps:

Step	Description
2.1 View Customer Aged Balances	Identify overdue balances and analyze open transactions to determine collection actions.
2.2 Review Customer Activity	Review historic customer activities and notes to confirm previous collection actions and communications.
2.3 Update Customer Details	Review and update customer contact and account details in D365 F&O to ensure collections communications are sent to the correct recipients and remain accurate.
2.4 Maintain Customer Direct Debit & eBanking Details	Review, create, and maintain customer direct debit, banking, and eBanking records to support automated payment processing, settlement activities, and TAS

© 2026 WiseTech Global

2.1 View Customer Aged Balances

Procedure

Complete the steps below to View Customer Aged Balances:

Action	Description
PROCESS START	***Pre-requisite:*** • *Customer accounts and posted transactions must be available in D365 F&O for aged balance review.*
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Click* **Modules**.	From the left-hand **Navigation Pane**, click **Modules**.
3. *Navigate* to the **Aged Balances** page.	From the **Navigation Pane**, select: • **Modules** > • **Credit and collections** > • **Collections** > • **Aged balances**. **Note:** The following icons indicate the age of customer balances. Periods + Add above + Add below Remove Up Down Period / Unit / Interval / Ageing indicator / Icon 90+ / -1 / Unlimited / Red diamond 61-90 / -30 / Day / Red X 31-60 / -30 / Day / Yellow exclamation point 1-30 / -30 / Day / Yellow triangle Current / 0 / Unlimited / Green check mark
4. *Sort* the **Aged Balances**.	Use the filters on the screen to sort the aged balances as required: • Sort amount due balance by largest > smallest. • Sort by **Customer**.
5. *Select* the required **Aged Balance**.	*Click* the **Name** of the **Customer** to open the **Collections** page. Name / Customer account MatchBox Exchange Limited / MATCHBXX1
6. *Review* **Open transactions**.	Under **Open transactions**, analyze the voucher information and balances to determine the required action. **Note:** check the icons displayed next to each balance.
STEP COMPLETE	*Continue to 2.2 Review Customer Activity*

2.2 Review Customer Activity

Procedure

Complete the steps below to Review Customer Activity:

Action	Description
PROCESS START	***Pre-requisite:*** • *The customer account must exist in D365 F&O, with previous collection activities recorded against the account for review.*
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Click* **Modules**.	From the left-hand **Navigation Pane**, click **Modules**.
3. *Navigate* to the **All Customers** page.	From the **Navigation Pane**, *select*: • **Modules >** • **Credit and Collections >** • **Customers >** • **All Customers.**
4. *Select* the relevant **Customer**.	*Click* the **Account** of the **Customer** to open the **Customer** page.
5. *Open* **All Activities**.	On the **Main Toolbar**, *select*: • **General >** • **Activities >** • **Activities >** • **All Activities.** A list of customer activities will be displayed.
6. *Select* an **Activity**.	*Click* an **Activity number** to view details.
7. *Review* **Activity**.	Review the activity details, including the **Type**, **Purpose**, and **Description** fields to confirm the context and outcome of previous interactions. It is good practice to verify that all required information and supporting attachments (e.g., emails or documents) have been recorded accurately. **Note:** If any details are missing or incorrect, update the record as needed before proceeding.
STEP COMPLETE	*Continue to 2.3 Update Customer Details*

2.3 Update Customer Details

Procedure

Complete the steps below to Update Customer Details:

Action	Description
PROCESS START	***Pre-requisite:*** • *The customer account must exist in D365 F&O.* *Note:* • *Customer contact details are synchronized between CW1 and D366. Users must ensure contact information is accurate, and that email Purpose is set to Business, so communications can be sent. Incorrect updates may result in contacts being excluded from communications.*
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Click* **Modules**.	From the left-hand **Navigation Pane**, click **Modules**.
3. *Navigate* to the **All Customers** page.	From the Navigation pane, select; • **Accounts receivable >** • **Customers >** • **All customers.** The **All customers** page is displayed.
4. *Search* for the **Customer.**	In the **Filter** field, start *typing* the **customer's name** or **account**. If searching by customer name, select **Name** from the dropdown list (alternatively select Account or Invoice account as required). The matching customer records are displayed in the list.
5. *Open the* **Customer Record.**	*Click* the **Account** hyperlink for the selected customer to open the record.
6. *Open* the **Contact Information** FastTab.	*Scroll* to and *expand* the **Contact information** FastTab. Existing customer contact records are displayed.

© 2026 WiseTech Global

Action	Description
7. *Review* **Existing contact information.**	Review all contact information and confirm that email addresses and phone numbers are correct. Some contract records may have been automatically synchronized from CargoWise1 (CW1). Each contact detail is stored as a separate record in D366. Multiple contacts may exist for a single customer. Confirm for each contact: • Contact details are valid (correct email address or phone number). • The Description clearly identifies the contact, i.e., name and role. • Email contacts used for collections emails have Purpose = Business. **Important**: Only contacts with Purpose = Business are used for AR activities, including invoices, statements, and collections communications. If Purpose is changed from Business, the contact maybe removed from AR communications and deleted through integration. If a contact is missing or incorrect, check whether it exists in CW1 as customer contact information may be primarily maintained in CW1.
8. *Add a* **New Contact.**	If the required contact does not exist, on the **Contact information** toolbar, *click* **+Add.** A new contact line is displayed.
9. *Enter a* **Description.**	In the **Description** field, *enter* the **contact's name**.
10. *Select* the **Contact Type.**	In the **Type** field, *select* the required contact type from the dropdown list e.g., Email address or Phone.
11. *Enter the* **Contact Details.**	In the **Contact number/address** field, *enter* the **email address** or **phone number**.
12. *Set* **Primary contact** *(if required).*	*Click* **Primary** checkbox if this is the main contact for the customer. Each customer should have one primary contact. **Note:** Primary contact is used as the default for communication in D366. Only one contact is marked as **Primary**.
13. *Set* **Communication Purpose** (if required).	On the Toolbar, *click* **Advanced**. The **Edit contact information** pane is displayed. *Click* the dropdown arrow in the **Purpose** field to select **Business.** **Note**: The contact is enabled for AR communications such as invoices, statements, and collections.

Action	Description
14. *Validate* **Contact setup.**	Confirm: • The correct contact(s) are set to **Purpose = Business** • No duplicate or incorrect contacts exists. **Important**: If Purpose does not equal Business, the contact may be excluded from AR communications and removed through integration. Updates to email and phone may synchronize between D365 and CW1 (name changes may not).
15. *Add* **Additional Email Addresses** *(if required).*	To add more email addresses, repeat the previous steps for each additional contact.
16. *Remove* **Old Contact Details** *(if required).*	To delete a contact, select it, then *click* **Remove** on the toolbar. When the message "*You are about to delete a record appears*," *click* **Yes**.
17. *Click* **Save**.	From the Main toolbar, *click* **Save**. The contact details are updated and synchronized where applicable.
PROCESS COMPLETE	*Customer contact details are correctly maintained for AR and Collections communications.*

2.4 Maintain Customer Direct Debit & eBanking Details

Note: This topic is planned to move to **240 Direct Debit** (initial scope shared with the O2C stakeholders on 3 November 2026; ADO Task 16894). It stays in this guide until 240 is published.

Procedure

Complete the steps below to Maintain Customer Direct Debit & eBanking Details:

Action	Description
PROCESS START	***Pre-requisite:*** • *The customer account must exist in D365 F&O, and the approved customer authorisation form with current banking details must be available before creating or updating direct debit and eBanking records.*
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Click* **Modules**.	From the left-hand **Navigation Pane**, click **Modules**.
3. *Navigate* to the **All Customers** page.	From the Navigation pane, select; • **Accounts receivable >** • **Customers >** • **All customers.** The **All customers** page is displayed.
4. *Search* for the **Customer.**	In the **Filter** field, start *typing* the **customer's name** or **account**. If searching by customer name, select **Name** from the dropdown list (alternatively *select* **Account** or **Invoice account** as required). The matching customer records are displayed in the list.
5. *Open the* **Customer Record.**	*Click* the **Account** hyperlink for the selected customer to open the record.
6. *Open* the **Payment defaults** FastTab.	*Scroll* to and *expand* the **Payment defaults** FastTab. This section controls how customer payments are processed in D366.
7. *Edit* the **Payment defaults.**	On the Main Toolbar, *click* **Edit** to update the customer payment configuration fields.

Action	Description
8. *Update* **Method of payment** field.	In the **Method of payment** field, *select* the required direct debit payment method from the dropdown list, e.g., DDHDBCAU, DDHSBCUS. The Method of payment determines how customer payments are generated and processed during direct debit payment runs. **Important**: When Method of payment is selected, D365 may automatically populate the related Payment specification field based on the configured payment setup.
9. *Validate* the **Payment specification** field.	Review the **Payment specification** and confirm that the automatically populated value is correct for the customer direct debit setup e.g., ACH-CCD = DDHSBCUS, DE = DDWBCAU. The Payment specification identified the banking configuration and payment file format used during direct debit processing. If the Payment specification field does not automatically populate, manually select the correct value from the dropdown list.
10. *Save* the **Payment default changes.**	On the Main toolbar, *click* **Save** to save the update before continuing.
11. *Click* **Modules**.	From the navigation pane, *click* **Modules** to expand the list of available functional areas.
12. *Navigate* to the **Customer eBanking details** page.	From the Navigation pane, select; • **Treasury Automation Suite** > • **Common** > • **Customer eBanking details.** The Customer eBanking details page is used to maintain customer eBanking records by Treasury Automation Suite for payment processing.
13. *Search* for the **Customer eBanking record**.	Search for the customer using the customer account or customer name. If an existing customer eBanking record is displayed, review and update the existing information as required.

<table>
<tr><th>Action</th><th>Description</th></tr>
<tr><td>14. Create a New eBanking record (If required).</td><td>If the customer does not already exist in Customer eBanking details, click +New. Populate the required fields:
<table>
<tr><th>Field</th><th>What to do?</th></tr>
<tr><td>Legal entity</td><td>Select the Legal entity from the dropdown list.</td></tr>
<tr><td>Invoice account</td><td>Enter or select the Customer account from the dropdown list.</td></tr>
<tr><td>Customer name</td><td>Enter or confirm the customer trading name.</td></tr>
<tr><td>Alternate Customer name</td><td>Enter the alternate customer's name or trading name if used for banking transactions or remittance reference.</td></tr>
</table>
Note: The Customer eBanking details record links the customer account to Treasury Automation Suite (TAS) payment processing functionality and is used during automated payment matching, direct debit processing, and customer settlement activities. Alternate customer names may assist TAS in identifying customer payments where the bank transaction narrative differs from the official customer's name.</td></tr>
<tr><td>15. Configure the eSettlement / Lockbox settings.</td><td>Scroll to and expand the eSettlement / Lockbox section and complete the following fields:
<table>
<tr><th>Field</th><th>What to do?</th></tr>
<tr><td>Settlement method</td><td>Select Oldest due date from the dropdown list.</td></tr>
<tr><td>Use Treasury Automation Suite parameters</td><td>Toggle to yes</td></tr>
</table>
Note: The eSettlement/lockbox settings control how imported customer payments and bank transactions are matched and settled against customer invoices during automated settlement processing. Incorrect settlement configuration may result in unmatched transactions, incorrect invoice allocations, or failed automated settlement processing.</td></tr>
</table>

<table>
<tr><th>Action</th><th>Description</th></tr>
<tr><td>16. Configure the Direct Debit settings.</td><td>Scroll to the Direct Debits section and update the required fields to enable the customer for direct debit processing.
<table>
<tr><th>Field</th><th>What to do?</th></tr>
<tr><td>Direct debit active</td><td>Toggle to yes to activate DD processing.</td></tr>
<tr><td>Inactive date</td><td>Leave blank</td></tr>
<tr><td>Enable method of payment / payment spec in journal</td><td>Toggle to Yes to allow TAS to automatically apply the configured direct debit Method of payment and Payment specification during payment processing.</td></tr>
</table>
Note: The Direct debit settings section controls whether the customer is enabled for automated direct debit processing within TAS. If these settings are not configured correctly, the customer may not be included in direct debit payment proposal processing.</td></tr>
<tr><td>17. Create a Customer bank account.</td><td>On the Main Toolbar, click Customer bank accounts.
The Customer bank accounts page is displayed.</td></tr>
<tr><td>18. Click +New.</td><td>On the Main Toolbar, click +New to create a customer bank record.
This stores the customer's banking information used for direct debit processing.</td></tr>
<tr><td>19. Click Edit.</td><td>On the Main Toolbar, click Edit.</td></tr>
<tr><td>20. Enter the Customer Bank Account fields.</td><td>Scroll to and expand the General section.
Complete the required bank account fields;
<table>
<tr><th>Field</th><th>What to do?</th></tr>
<tr><td>Customer Bank account</td><td>Enter the short identifier or code for the bank account.</td></tr>
<tr><td>Name</td><td>Enter the Bank account name.</td></tr>
<tr><td>Bank account number</td><td>Enter the bank account number from the approved form.</td></tr>
<tr><td>BSB / Routing number</td><td>Enter the BSB number (AU) or Routing number (US) supplied by the customer.</td></tr>
<tr><td>Region</td><td>Select the relevant region</td></tr>
<tr><td>Currency</td><td>Select the Currency used for invoicing and payment processing</td></tr>
</table>
Important:
Banking details must match exactly the approved customer authorization form. Incorrect banking information may cause direct debit errors.</td></tr>
</table>

<table>
<tr><th>Action</th><th>Description</th></tr>
<tr><td>21. Add Address information.</td><td>Scroll to and expand the Address section. On the Address Toolbar, click +New. The New address pane will open.
<table>
<tr><th>Field</th><th>What to do?</th></tr>
<tr><td>Name or description</td><td>Enter the short description for the address, e.g., USA Bank account.</td></tr>
<tr><td>Country / region</td><td>Select the country associated with the customer's bank account.</td></tr>
</table>
Note: A full physical bank address is not required for this process.</td></tr>
<tr><td>22. Click Save.</td><td>On the Main toolbar, click Save to save the customer's bank account configuration.</td></tr>
<tr><td>23. Return to Customer eBanking details screen.</td><td>On the Main Toolbar, click the back arrow to return to the Customer eBanking details screen.</td></tr>
<tr><td>24. Create a Payment specifications record.</td><td>On the Main toolbar, click Payment specifications tab to open the Customer eBanking payment spec details.</td></tr>
<tr><td>25. Click +New.</td><td>On the Main Toolbar, click +New to create a new payment specification record used for direct debit processing.</td></tr>
<tr><td>26. Populate the Payment specifications fields.</td><td>In the Customer eBanking spec details page, complete the following fields:
<table>
<tr><th>Field</th><th>What to do?</th></tr>
<tr><td>Method of payment</td><td>Select the required direct debit Method of payment from the dropdown list.</td></tr>
<tr><td>Payment specification</td><td>Select the required Payment specification associated with the payment file format and banking configuration.</td></tr>
<tr><td>Payment bank account</td><td>Select the WiseTech company bank account that will be used to process and receive direct debit payments.</td></tr>
</table></td></tr>
<tr><td>27. Save the Payment specification record.</td><td>On the Main toolbar, click Save to finalize the direct debit payment specification setup.</td></tr>
<tr><td>28. Validate the Direct Debit configuration.</td><td>Review and confirm the following information is correctly configured:
Method of payment is correct.
Payment specifications are assigned.
Customer bank accounts exist.
The currency is correct.
Direct debits are activated.
The company's bank account is assigned.</td></tr>
</table>

Action	Description
29. *OPTIONAL: Update or Remove* **Direct Debit Details**.	If a customer changes payment method or opts out of direct debit processing: • Update or remove the Method of payment • Update or remove the Payment specification • Remove direct debit related banking details where required. • Update the customer to a new agreed payment arrangement. Examples include: • Customer changing from Direct Debit to EFT • Customer moving to Credit Card payments • Customer temporarily opting out of direct debit processing.
PROCESS COMPLETE	***Outcomes**:* • *Customer direct debit and eBanking details are correctly configured in D365 F&O and TAS.* • *Customer payment methods and banking information are accurately maintained for direct debit processing.* • *Customer records reflect current payment arrangements and direct debit status.*

3. Customer Pool and Collection Agents

Description

Customer Pools group customer accounts using defined criteria, such as customer group, legal entity or financial dimensions. Assigning these pools to Collection Agents in D365 F&O establishes customer ownership and supports consistent follow-up and workload allocation. This topic covers creating pools, validating membership, configuring agents and maintaining assignments as responsibilities change.

Responsibility

Managers are responsible for creating and maintaining Customer Pools, validating pool criteria and membership, and configuring Collection Agents and their pool assignments. Before configuration, the agent must exist as a Worker linked to a User ID, and the Customer Pool must exist before assignment.

Initiation

This process is initiated when a new customer group, business area, legal entity or acquisition requires collections ownership; a Collections Officer joins or leaves the team; or existing pool criteria, agent assignments or ownership responsibilities change.

Topic Overview

The **Customer Pool and Collection Agent Configuration topic** includes these steps:

Step	Description
3.1 Create Customer Pools for Collections	Create a Customer Pool with a unique ID, description and pool type of Collections. Define the approved criteria, preview the included customers to validate membership, and save.
3.2 Add a New Collections Agent	Add the Worker to the Collections team, select the agent and assign one or more existing Customer Pools. Set a default pool where applicable and save the assignments.

© 2026 WiseTech Global

3.1 Create Customer Pools for Collections

Procedure

Complete the steps below to Create Customer Pools for Collections.

Action	Description
PROCESS START	***Pre-requisite:*** • *Customer grouping criteria (e.g., customer group, legal entity or financial dimensions) must be defined in line with approved business rules.*
1. *Check* the **Entity**.	Confirm that you are signed into the correct legal entity. The entity name is shown in the top-right corner of the screen.
2. *Click* **Modules**.	From the navigation pane, *click* **Modules** to expand the list of available functional areas.
3. *Navigate* to **Customer Pools**.	• **Credit and collections** > • **Setup** > • **Customer pools**.
4. *Click* **New**.	Create a new **Customer Pool Record**.
5. *Enter* the **Pool ID**.	In the **Pool ID** field, enter the unique code for the Customer Pool.
6. *Enter the **Pool Description***.	In the **Pool description** field, enter a clear description of the Customer Pool.
7. *Select* the **Pool Type**.	In the **Pool type** field, select **Collections**.
8. *Click* **Select Pool Criteria**.	Open the **Advanced Query** window to define which customer accounts are included in the Customer Pool.
9. *Add* **Criteria Range**.	On the **Range** tab, click **Add**.
10. *Define* the **Criteria**.	Select the required **Table**, **Field**, and **Criteria** based on the approved business rules. For example, this may include customer group, state, credit limit, or financial dimension.
11. *Click* **OK**.	Save the selected criteria and return to the **Customer pools** page.
12. *Preview* the **Customer Pool**.	Click **Preview pool customers** to confirm that the correct customer accounts are included.
13. *Click* **Save**.	If the preview is correct, close the preview and click **Save**.
PROCESS COMPLETE	

3.2 Add a New Collections Agent

Procedure

Complete the steps below to Add a New Collections Agent.

Action	Description
PROCESS START	***Pre-requisite:*** • *A customer pool must already be created before it can be assigned to a Collections Agent.*
1. *Check* the **Entity**.	Confirm that you are signed into the correct legal entity. The entity name is shown in the top-right corner of the screen.
2. *Click* **Modules**.	From the navigation pane, *click* **Modules** to expand the list of available functional areas.
3. *Navigate* to the **Collections Agents** page.	• **Credit and collections** > • **Setup** > • **Collections agents**.
4. Click **New**.	Create a new **Collections Agent Record**.
5. *Add* the **Worker** to the Collections Team.	Scroll to **Team members**, search for and select the worker's name, then click **Add**.
6. *Select* the **New Agent**.	Return to **Credit and collections > Setup > Collections agents** and select the newly added agent.
7. *Expand* the **Customer Pools FastTab**.	Open the **Customer pools** section for the selected agent.
8. *Click* **Add**.	Add a **New Customer Pool** assignment line.
9. *Select* the **Pool ID**.	Select the **Pool ID** the agent will manage.
10. *Set* the **Default Pool**.	If applicable, set **Default pool = Yes** for the agent's primary customer pool.
11. *Repeat* for additional pools.	If the agent manages multiple customer pools, repeat the pool assignment steps as required.
12. *Click* **Save**.	Save the **Collections Agent** and assigned **Customer Pools**.
PROCESS COMPLETE	

4. Contact Customer

Off-system: this step is completed outside the D365 system.

Description

The **Contact Customer** process involves reaching out to customers with outstanding balances to discuss overdue amounts and agree on the next steps toward resolution.
Using information gathered from the aged balances and prior activity history, the **Collections Officer** contacts the customer by phone or email to:

- Discuss overdue invoices and payment status,
- Confirm if there are any disputes or payment delays, and
- Determine an appropriate resolution (e.g., payment arrangement, resend of statement, or escalation for further action).

Note: All customer contact must be recorded in D365 F&O as a new customer activity, including call notes or email correspondence, to maintain a complete communication history.

Responsibility

The **Collections Officer** is responsible for contacting customers regarding overdue balances, ensuring all communication is professional, accurate, and documented in D365 F&O.
They must follow up on unresolved accounts and take appropriate action based on the customer's response — such as initiating payment arrangements, resending statements, or escalating to the next stage of the collections process.

Initiation

This process is initiated when the Collections Officer, after reviewing aged balances and customer activity, **identifies an overdue account requiring follow-up**.

Customer contact may also occur:

- In response to a customer's request for account details; or
- As part of routine collection monitoring to ensure timely payment.

5. Record New Customer Activity

Description

Recording new customer activity in D365 F&O ensures that all collection actions and communications are accurately tracked and auditable.

After contacting a customer, the Collections Officer must create a new activity entry to capture details such as the contact type, purpose, and outcome.

Each activity record should include:

- **Type** (e.g., phone call, email, meeting),
- **Purpose** (e.g., outstanding debt, payment follow-up, dispute resolution), and
- **Notes** summarizing the discussion or agreed actions.

Important: It is a mandatory requirement to attach any relevant supporting documents to a Customer Activity – such as customer emails, payment confirmations, or dispute correspondence. This ensures that all collection activities are properly documented, easily traceable, and compliant with audit requirements at WiseTech.

Responsibility

The **Collections Officer** is responsible for creating and maintaining accurate activity records for all customer interactions. They must ensure that each communication or action related to a customer's outstanding balance is documented in D365 F&O with the appropriate attachments and notes. Failure to record or attach relevant correspondence may impact visibility of account status and hinder follow-up actions.

Initiation

This process is initiated **immediately following customer contact** (via phone or email) or upon completion of any collection-related action that requires documentation in D365 F&O. It is part of the daily collections routine and ensures that all customer interactions are captured for reference in future reviews and audits.

Procedure: Follow the steps on the next page to execute this task in-system.

© 2026 WiseTech Global

Procedure

Complete the steps below to Record New Customer Activity.

<table>
<tr><th>Action</th><th>Description</th></tr>
<tr><td>PROCESS START</td><td>Pre-requisite:
The customer account must exist in D365 F&O, and details of the customer interaction or collection action, including any relevant supporting documents, must be available before recording the activity.</td></tr>
<tr><td>1. Check the Entity.</td><td>Confirm you are signed into the correct Legal Entity (top-right).</td></tr>
<tr><td>2. Click Modules.</td><td>From the left-hand Navigation Pane, click Modules.</td></tr>
<tr><td>3. Navigate to the All Customers page.</td><td>From the Navigation Pane, select:
Modules >
Credit and Collections >
Customers >
All Customers.</td></tr>
<tr><td>4. Select the relevant Customer.</td><td>Click the Account of the Customer to open the Customer page.</td></tr>
<tr><td>5. Navigate to All Activities > Record Event.</td><td>On the Main Toolbar, select:
General >
Activities >
Activities >
All Activities.
A list of customer activities will be displayed.</td></tr>
<tr><td>6. Click + New.</td><td>Select the most relevant type from the list:<table><tr><th>Activity Type</th><th>Description</th></tr><tr><td>Action</td><td>...is used for immediate collection follow-up like a phone call or reminder that has happened.</td></tr><tr><td>Appointment</td><td>...is used for scheduling a future interaction, e.g., a follow-up call or meeting.</td></tr><tr><td>Event</td><td>...may be used for general updates or larger collection milestones.</td></tr><tr><td>Task</td><td>...is used for setting reminders for internal follow-up (e.g., check status next week).</td></tr></table></td></tr>
</table>

© 2026 WiseTech Global

<table>
<tr><th>Action</th><th>Description</th></tr>
<tr><td>7. Populate the Activity Record.</td><td>Enter the required details:
<table>
<tr><th>Field</th><th>What to do?</th></tr>
<tr><td>Purpose</td><td>Enter the Purpose of the interaction, e.g., Outstanding debt.</td></tr>
<tr><td>Priority</td><td>Update the Priority. This field will default to the status of ‘Normal.’</td></tr>
<tr><td>Type</td><td>Select the most relevant interaction Type, e.g., Phone call.</td></tr>
<tr><td>Description</td><td>Enter a detailed Note of the interaction, action taken, etc., e.g., Customer has promised to pay by 1 April 2026.</td></tr>
</table></td></tr>
<tr><td>8. Click Attachments.</td><td>Attach any supporting documents relevant to the activity, such as customer emails, payment confirmations, or dispute correspondence.
Note: This is a mandatory requirement.</td></tr>
<tr><td>9. Click + New.</td><td>Select the relevant file type (usually ‘File’). Upload additional attachments or related items (e.g., supporting invoices or screenshots) to provide complete context for the activity.</td></tr>
<tr><td>10. Click Save.</td><td>This will Save the activity record to finalize the entry. The new customer activity will now be recorded in D365 F&O and visible in the customer activity log.</td></tr>
<tr><td>PROCESS COMPLETE</td><td>Outcomes:
Customer activities are recorded inD366.
Supporting document are attached to the activity record.
Customer interaction history is maintained for collections follow-up.</td></tr>
</table>

6. Action / Resolution

Description

The **Action / Resolution** stage in the Collections process captures potential steps taken to resolve an outstanding customer balance following contact and activity review. Depending on the outcome, the **Collections Officer** may choose one or more of the following resolution of actions.

Responsibility

- The **Collections Officer** is responsible for determining the appropriate resolution action based on customer response and account status. They execute or initiate the relevant process in D365 F&O and must ensure that all actions are documented through customer activity records.
- The **Group Billing & Credit Manager** is responsible for reviewing and approving any debt write-off requests and ensuring compliance with WiseTech's credit control policies.

Initiation

This process is initiated following customer contact and review of the account's aged balance and activity history. Actions are taken based on the outcome of customer communication. E.g., when a customer requests supporting documents, disputes a charge, or fails to make payment.

Topic Overview

The **Action / Resolution** topic includes these steps:

Step	Description
6.1 Resend Statement or Invoice	Generate and send updated customer documents to support account reconciliation or requests.
6.2 Create & Send Collection Letter	Generate and issue a formal letter to customers with overdue accounts in line with WiseTech collection policies. ***Note:*** *Only required if automation fails.*
6.3 Change Customer Status	Update the customer's account status in D365 F&O to reflect escalation or resolution outcomes.
6.4 Debt Write-off	Initiate and process the write-off of uncollectible debts once management approval has been obtained.

Note: Settling and unsettling customer accounts, transferring open or closed payments, and writing off bank fees or small residuals moved to **220 Customer Payments** (version 3.0, topics 2.3, 3.1, 3.3 and 3.6) in version 2.4. Writing off an uncollectible debt stays in this guide (6.4).

6.1 Resend Statement or Invoice

Procedure

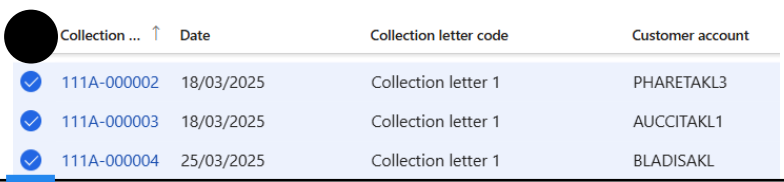

Complete the steps below to Resend Invoice/s to Customer:

Action	Description
PROCESS START	***Pre-requisite:*** • *The customer account and relevant posted transactions must exist in D365 F&O, with valid recipient details and print management settings configured for delivery.*
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Click* **Modules**.	From the left-hand **Navigation Pane**, click **Modules**.
3. *Navigate* to the **All Customers** page.	From the **Navigation Pane**, *select*: • **Credit and Collections** > • **Customers**> • **All customers** A list of customers is displayed.
4. *Select* the relevant **Customer**.	In the **Account** field, enter or search for the customer account. *Click* the **Account** hyperlink to open the customer record.
5. *Navigate* to the **Tax Invoice Journal** page.	On the **Main Toolbar**, *select*: • **Invoice** > • **Journals** > • **Tax invoice journal.**
6. *Select* the **Tax Invoice**.	A list of all **Tax invoice journals** for the customer is displayed. Select the required tax invoice to highlight the line.
7. *Click* **Document**.	From the **Action Pane**, *click* **Document** to access invoice output options.
8. *Click* **Send**.	Select **Send** > **Copy** to generate and prepare the invoice for delivery based on the customer's print management settings.
9. *Click* **Print Management**.	Review the **Print management** settings to confirm the delivery method (e.g., email) and recipient details are correct. Update if required.
10. *Confirm* and *Send* the **Invoice**.	*Click* **OK** to send the invoice to the customer using the configured delivery method.
PROCESS COMPLETE	***Outcomes****:* • *Customer invoices are successfully resent to the customer.* • *Invoice delivery details are validate before sending.*

6.2 Create & Send Collection Letter

Procedure

Complete the steps below to Create & Send Collection Letter:

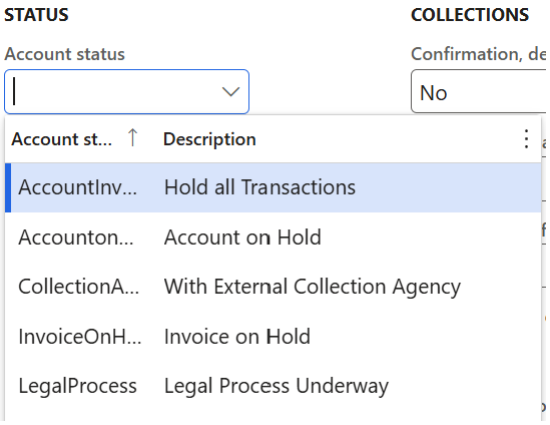

<table>
<tr><th>Action</th><th>Description</th></tr>
<tr><td>PROCESS START</td><td>Pre-requisite:
The customer must have overdue invoices requiring a collection letter and a valid recipient email address set to Purpose = Business. Manual processing is only required if automated collection letter processing fails.</td></tr>
<tr><td>1. Check the Entity.</td><td>Confirm you are signed into the correct Legal Entity (top-right).</td></tr>
<tr><td>2. Click Modules.</td><td>From the left-hand Navigation Pane, click Modules.</td></tr>
<tr><td>3. Navigate to the Create Collection Letter page.</td><td>From the Navigation Pane, select:
Credit and Collections >
Collection Letter >
Create Collection Letter.</td></tr>
<tr><td>4. Populate the Create Collection Letter form.</td><td>Enter the required fields:<table><tr><th>Field</th><th>What to do?</th></tr><tr><td>Collection letter date</td><td>Enter the relevant date.</td></tr><tr><td>Use Posting Profile from</td><td>Ensure this field is set to ‘Account’</td></tr><tr><td>Posting Profile</td><td>Ensure this field is set to ‘DEF’</td></tr><tr><td>Customer account</td><td>Under Records to include, click the Filter (funnel) icon and select a specific Customer/s.</td></tr></table></td></tr>
<tr><td>5. Click OK.</td><td>The system will process and generate the collection letter.</td></tr>
<tr><td>6. Navigate to the Review and Process Collection Letters page.</td><td>From the Navigation Pane, select:
Modules >
Credit and Collections >
Collection Letter >
Review and Process Collection Letters.</td></tr>
<tr><td>7. Select the relevant Collection Letter/s.</td><td>Click the checkbox to the left for one or more collection letters. 
</td></tr>
<tr><td>8. Click Post.</td><td>This will open the Post collection letter note form.</td></tr>
<tr><td>9. Click OK.</td><td>This will post the collection letter.</td></tr>
<tr><td>10. Click Collection letter note.</td><td>On the Main Toolbar, click Print > Collection letter note.</td></tr>
</table>

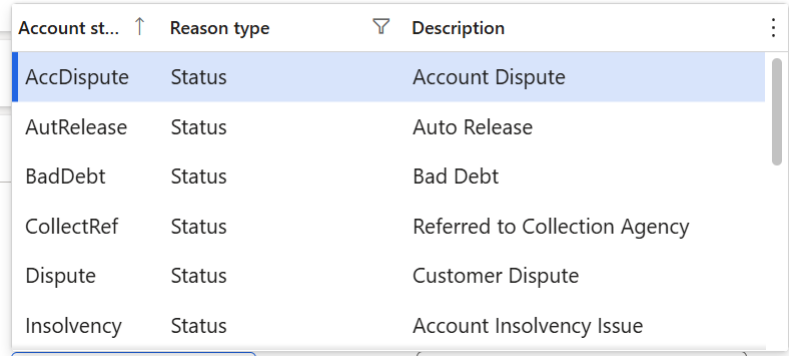

11. *Set* **Use print management destination** to **Yes**.	This will apply the specific print management settings that have been configured for the customer, and output has been automated.
12. *Click* **OK**.	Once completed, the collection letter will be generated and delivered according to the output selection.
13. *Send* the **Collection Letter** to **the Customer**.	Export the collection letter as a .PDF file and send it to the customer using Outlook.
PROCESS COMPLETE	***Outcomes**:* • *Collection letters are successfully generated and issued to the customers.* • *Collection letter delivery settings are applied correctly.* • *Customers receive formal overdue payment notifications.*

6.3 Change Customer Status

Procedure

Complete the steps below to Change Customer Status:

Action	Description
PROCESS START	***Pre-requisite:*** • *The customer account must exist in D365 F&O, and the required account status and reason for the change must be confirmed before updating the record.*
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Click* **Modules**.	From the left-hand **Navigation Pane**, click **Modules**.
3. *Navigate* to the **All Customers** page.	From the **Navigation Pane**, *select*: • **Credit and Collections** > • **Customers** > • **All Customers.**
4. *Select* the relevant **Customer**.	In the **Account** field, enter or search for the customer whose account status needs to be changed. *Click* the **Account** hyperlink to open the customer record.
5. *Enable* **Edit** in the **Account Status** field.	Under the **Credit and collections** FastTab, *hover* over the **Account status** field. When the pencil (edit) icon appears, *click* the **Edit** icon to enable editing.
6. *Select* the new **Account Status**.	From the **Account status** drop-down list, select the most relevant status based on the customer's condition. Typical options include: • *Account on Hold* – used when further invoicing or delivery should be paused. • *Collection Agency* – used when the debt has been referred to an external collection agency. • *Legal Process* – used when legal action is underway. 

Action	Description
7. *Select* the **Account Status Reason**.	In the **Account status** reason drop-down, *select* the appropriate reason for the change (e.g., Bad Debt, Account Dispute, Insolvency Issue). 
8. *Verify* **dependent fields**.	Check that the **Confirmation**, **Delivery**, and **Invoicing** fields have been automatically updated based on the selected account status. This ensures that business rules tied to that status are enforced.
9. *Click* **Save**.	On the Main Toolbar, *click* **Save** to apply the change.
10. Record Customer Activity.	Go to **General** > **Activities** > **Activities** > **All Activities**. *Click* **+ New,** select **Action**, and record details.
11. *Notify* relevant **Stakeholders**.	Send an **email** or **Teams** message to the **Group Billing and Credit Manager** or **Finance team** to inform them of the account status change. Include: • Customer name and account number • New account status and reason • Summary of actions taken • Reference to the activity note created.
12. *Update* **Local systems** (if applicable).	Where applicable, notify the operational or billing team to block the customer account in local systems, ensuring the hold is enforced consistently across platforms.
13. *Confirm* **Completion**.	Ensure the customer's account now reflects the correct status and that relevant parties have acknowledged the change. ***Note:*** *ensure to document this in the Customer Activity record.*
OPTIONAL: Add visibility to the customer list view.	On the **All customers** grid, right-*click* the column header and select Insert columns. Add: • **Account status**, • **Account status reason**, then • *Click* **Update**. These columns will display directly on the All Customers grid, allowing for quick visibility of customers on hold or in collection.

Action	Description
14. *OPTIONAL* *Exclude* **Customer from Credit Management**	If the customer should not be included in automated collection activities or Direct Debit processing, navigate to the Customer record. From the Navigation pane, select: • **Modules** > • **Credit and collections** > • **Customers** > • **All customers**
15. *Search* for the **Customer**.	In the Customer account field, enter or search for the customer account requiring exclusion for collections processing. *Click* the **account hyperlink** to open the customer record
16. *Open* the **Credit and collections fasttab**.	*Scroll* down and *expand* the **Credit and collections** fasttab.
17. *Enable* **Exclude from Credit Management.**	In the Credit and collections fasttab, *click* the **Exclude from credit management** checkbox.
18. *Click* **Save**.	To apply the update to the customer account.
19. *OPTIONAL* *Exclude* **Transaction from Credit Management.**	If a specific invoice or transactions should not be included in automated collection activities or Direct Debit processing, navigate to the customer transaction page for the customer account being reviewed. From the customer record, on the Main Toolbar, select **Customer > Transactions > Transactions**.
20. *Review* the **Customer transactions**.	*Locate* and *review* the **transaction requiring exclusion from collections processing**. Confirm the invoice number, outstanding balance and transactions are correct before continuing.
21. *Enable* **Exclude from Credit management.**	On the transaction line, *locate* the **Exclude from credit management** column and *click* the **checkbox** for the required transaction. This setting excludes the transaction from automated collections letters and automated credit management processing activities.
PROCESS COMPLETE	

6.4 Debt Write-off

Procedure

Complete the steps below to Write-off Debt:

Action	Description
PROCESS START	***Pre-requisites:*** *When all reasonable collection efforts have failed, send a Debt Write-off Request to the Group Billing & Credit Manager via Outlook email. Include:* • *customer account,* • *outstanding balance,* • *collection history summary, and* • *justification for the write-off.* *The Group Billing & Credit Manager reviews the request and determines write-off eligibility. If approved, Group Billing & Credit Manager will complete the below steps.*
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Click* **Modules**.	From the left-hand **Navigation Pane**, click **Modules**.
3. *Navigate* to the **Aged Balances** page.	From the **Navigation Pane**, *select*: • **Credit and Collections** > • **Collections** > • **Aged balances.**
4. *Select* the relevant **Customer**.	In the **Account** field, enter or search for the customer account. *Click* the **Account** hyperlink to open the customer record.
5. *Review* the **Outstanding Balance**.	Verify the **Overdue Transactions** to confirm the correct amount and ensure it aligns with the approved write-off value.
6. *Navigate* to **Open Transactions**.	From the customer record, *click* **Open** transactions to view the individual invoices or balances eligible for write-off.
7. *Select* **Transactions** to write off.	Select the specific **Invoice/s** or **Transaction/s** to be written off. Ensure that only the approved amounts are selected.
8. *Click* **Write-off**.	On the toolbar, *click* **Write-off**.
9. *Enter* **Write-off details.**	In the **Write-off Details** window, complete the required fields: • Write-off date – Enter the date of approval. • Reason code – Select the appropriate reason (e.g., Bad Debt, Unrecoverable, Customer Bankrupt, Over/Short).
10. *Verify* **Posting Details**.	Review that the correct main account and offset account for write-off are applied based on configuration. If required, update the posting layer or dimension.
11. *Confirm* **the Write-off**.	*Click* **OK** to post the write-off journal.

Action	Description
12. *Review* the **Write-off Journal**.	Navigate to **General Ledger** > **Journal entries** > **General Journals**. Open the newly created write-off journal and verify that the debit and credit entries are balanced and posted correctly.
13. *Validate* the **Journal.**	On the Main **T**oolbar, *click* **Validate** > **Simulate posting** to confirm there are no errors. If validation errors are displayed, review the error message, correct the issue, and repeat validation before continuing.
14. **Record the Write-off activity.**	Navigate to **Modules** > **Credit & Collections** > **Customers** > **All customers**. Search for and open the relevant **Customer account**. From the customer page, on the Main Toolbar, go to **General** > **Activities** > **Activities** > **All activities**. *Click* **+ New**, select Action (Type), and record: • **Purpose**: Debt Write-off approved • **Description**: $X written off on [date] due to [reason] for the write-off. *Click* Save to record the activity. ***Note:*** *The write-off activity must be recorded before submitting the journal for approval to ensure the request is documented and auditable.*
15. *Submit* the **Journal** for **Approval**.	On the Main Toolbar, *click* **Approval** > **Report as ready**. The journal has been submitted for approval. The approver will receive a notification to review and approve the journal. Once approved, notification is sent confirming approval.
16. *Notify* **Stakeholders**.	Email or message the relevant stakeholders confirming the write-off completion.
PROCESS COMPLETE	

7. Update & Close Customer Activity

Description

Updating and closing customer activity in **D365 F&O** ensures that all collection tasks and interactions are accurately finalized and recorded for audit and reporting purposes.
Once a customer's query or collection action has been resolved, the **Collections Officer** must update the corresponding activity record to reflect the outcome and mark it as complete.

Each activity update should include:

- **Resolution details** summarize the outcome of the activity (e.g., payment received, collection letter sent, account on hold).
- **Supporting attachments**, such as confirmation emails, payment receipts, or correspondence.
- **Completion status**, confirming that no further follow-up is required.

It is a **mandatory requirement** to attach any relevant supporting documents—such as emails or evidence of resolution—to the activity record before closure.
This ensures all collection activities are fully documented, traceable, and compliant with audit and recordkeeping requirements.

Responsibility

The **Collections Officer** is responsible for reviewing, updating, and closing customer activity records once the related action has been completed. They must ensure that the activity accurately reflects the outcome and that all supporting documentation is attached in **D365 F&O** before marking the activity as complete. Failure to close activities or attach relevant evidence may result in incomplete records and reduced visibility of customer resolution history.

Initiation

This process is initiated **after completing any collection-related action** (e.g., sending a collection letter, confirming payment, changing customer status, or processing a write-off). Closing the activity ensures that all actions taken are finalized in **D365 F&O**, maintaining accurate and up-to-date records of customer interactions and collection outcomes.

Procedure: Follow the steps on the next page to execute this task in-system.

Procedure

Complete the steps below to Update & Close Customer Activity:

Action	Description
PROCESS START	***Pre-requisite:*** • *The customer account must exist in D365 F&O, and the required account status and reason for the change must be confirmed before updating the record.*
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Click* **Modules**.	From the left-hand **Navigation Pane**, click **Modules**.
3. *Navigate* to the **All Customers** page.	From the **Navigation Pane**, *select*: • **Modules** > • **Credit and Collections** > • **Customers** > • **All Customers.**
4. *Select* the relevant **Customer**.	In the **Customer** account field, enter or search for the customer whose account status needs to be changed. *Click* the **Account number** to open the customer record.
5. *Navigate* to **All Activities > Record Event.**	From the **Main Toolbar**, *select*: • **General** > • **Activities** > • **Activities** > • **All Activities**. A list of customer activities will be displayed.
6. *Select* the relevant **Activity** from the list.	Identify and open the activity to be updated and closed.
7. *Populate* the **Resolution** section.	Enter the outcome or resolution details, such as payment received, collection letter sent, or debt written off. Ensure all notes are clear and concise.
8. *Attach* **Supporting Documentation**.	Upload any relevant attachments (e.g., confirmation emails, invoices, or correspondence) to the activity record before closure.
9. *Click* **Set as complete**.	Mark the activity as complete to close it. The activity will move from an active to a closed status.
PROCESS COMPLETE	The customer activity is now closed and recorded as part of the collection's history.

Part 3: Reports (Collections)

Page Overview

This page contains various reports related to the **Credit Collections process**.

Customer Ageing Report

Navigation	Description
• ***Credit and Collections*** > • ***Enquiries and reports*** > • ***Customers*** > • ***Customer ageing report***.	The Customer aging report displays the balances that are due from customers, sorted by date interval, or aging period.

Customer Report

Navigation	Description
• ***Credit and Collections*** > • ***Enquiries and reports*** > • ***Customers*** > • ***Customer report***.	The customer report displays detailed insights on customer data such as contact information, purchasing history, and payment details.

Customer Balance list

Navigation	Description
• ***Credit and Collections*** > • ***Enquiries and reports*** > • ***Customers*** > • ***Customer balance list report***.	The customer balance list report displays side by side customer balances for the defined periods. This report helps you quickly analyses changes in accounts receivable.

Customer Account Statement

Navigation	Description
• ***Credit and Collections*** > • ***Enquiries and reports*** > • ***Customers*** > • ***Customer account statement.***	The customer statement outlines a customer's financial transactions over a certain period and highlights the current outstanding balance.
