About this guide

WHAT is this guide used for?

This guide includes context and step-by-step 'how to's' about the **D365 F&O: AR Collections Export to Excel process**. It has been developed as the primary on-the-job reference to support WTG team members responsible for completing D365 F&O system tasks.

HOW to navigate this guide?

This guide is made up of Parts and Topics. A Part represents a collection of related topics (e.g., a set of related procedures). A Topic represents a specific item of information related to the Part. Each Part and Topic can be accessed from the Table of Contents.

Part 1: What do I need to know?

This part provides an overview of the end-to-end business process covered in this document. It outlines the purpose, scope, and context of the process within the broader functional stream, and introduces key roles, systems, and activities involved.

Part 2: How do I do it?

This part contains detailed steps on completing specific tasks in the D365 system. The instructions used in this guided approach are split into two main (2) sections:

- Action: section one (1) of the information table; one individual action per row, beginning with an italicized verb.
- Description: section two (2) of the information table; location, exact values, context, expected results and relevant notes.

Note: Part 1 and Part 2 will be consistent across all D365 Procedure Guides (PGs). PGs may include additional Parts covering major topics related to the specific module / PG.

Hyperlinks are used throughout this document. *Click* on a hyperlink to directly navigate to another topic in this guide, or to an external resource.

Key

The table below defines what colors are used to highlight specific sections in this document:

Color	Definition
	Highlight an off-system action
	Highlights the start / end of a step.
	Highlights the end of the process.

Part 1: What do I need to know? (AR Collections Export to Excel)

High-level process

Part Description

This guide explains how a Collections Officer exports the rows of a D365 grid to Excel for internal analysis. It covers preparing the grid columns, using **Export all rows** from the grid header and checking that the exported file includes the fields you need. The export is not a customer-facing document. Searching the custom all-customer transaction report and locating bank statements are outside the scope of this guide.

Initiation

- A Collections Officer needs D365 grid data in Excel for internal analysis.

Stream

Stream	Process Area	Key Roles
Accounts Receivable	AR Collections	• Collections Officer

Process

The high-level process is as follows:

#	Action	Who	When	Where
1	Export All Rows from a Grid	Collections Officer	When grid data is needed in Excel for internal analysis	D365

© 2026 WiseTech Global

Roles and responsibilities

Overview

The Collections Officer exports grid data in their own D365 session.

Tasks / Business Roles	Collections Officer
Export All Rows from a Grid	R

*R = Responsible

Key concepts

Overview

Before you start, you need to know what an export contains and the rule for using exported data.

Grid exports

Term	Description
Export all rows	An option on the grid header that exports the grid's rows to an Excel file.
Configured columns	The export contains the columns configured on the grid. Add any column you need before you export.
Export volume	Limits apply to how much data can be exported. The limits for your environment are pending confirmation.

Using exported data

Rule	Description
Internal analysis only	Use exported data for internal analysis. Customer-facing invoices and account documents use the approved PDF output. Do not send a customer an Excel export.
Exported customer data	Exported files can contain customer information. Store and share them according to the approved data handling rules.

Part 2: How do I do it? (AR Collections Export to Excel)

1. Export All Rows from a Grid

Description

Use this procedure to export the rows of a D365 grid to Excel for internal analysis. You prepare the grid columns, export all rows from the grid header and check the exported file.

Responsibility

- Collections Officer: exports grid data for internal analysis.

Initiation

- A Collections Officer needs D365 grid data in Excel for internal analysis.

Procedure

Complete these steps to export all rows from a grid:

Action	Description
PROCESS START	*Pre-requisites:* • Access to D365 and to the page that holds the data. *Responsibility:* • Collections Officer
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Open* the page that holds the data.	Open the D365 page whose grid holds the data you need, for example **Aged balances** from your **Favorites**.
3. *Confirm* the grid shows the columns you need.	The export contains the columns configured on the grid. If a column is missing, add it with **Insert columns** (see the AR Collections Personalized Views guide).
4. *Right-click* the grid header.	Right-click the header of any column in the grid.
5. *Select* **Export all rows**.	Select **Export all rows** from the menu.
6. *Download* the export.	Download the exported file when D365 has prepared it.
7. *Open* the exported file.	Open the downloaded file in Excel.
8. *Confirm* the required fields were exported.	Check that the file includes every field you need for your analysis.
PROCESS COMPLETE	*Outcomes:* • The grid rows are exported to an Excel file with the configured columns. • The file is used for internal analysis only.

Part 3: Reports (AR Collections Export to Excel)

Overview

Reports for this process are pending SME confirmation.
