About this guide

WHAT is this guide used for?

This guide includes context and step-by-step 'how to's' about the **D365 F&O: O2C Getting Started tasks**. It has been developed as the primary on-the-job reference to support WTG team members responsible for completing D365 F&O system tasks.

HOW to navigate this guide?

This guide is made up of Parts and Topics. A Part represents a collection of related topics (e.g., a set of related procedures). A Topic represents a specific item of information related to the Part. Each Part and Topic can be accessed from the Table of Contents.

Part 1: What do I need to know?

This part provides an overview of the end-to-end business process covered in this document. It outlines the purpose, scope, and context of the process within the broader functional stream, and introduces key roles, systems, and activities involved.

Part 2: How do I do it?

This part contains detailed steps on completing specific tasks in the D365 system. The instructions used in this guided approach are split into two main (2) sections:

- Action: section one (1) of the information table; one individual action per row, beginning with an italicized verb.
- Description: section two (2) of the information table; location, exact values, context, expected results and relevant notes.

Note: Part 1 and Part 2 will be consistent across all D365 Procedure Guides (PGs). PGs may include additional Parts covering major topics related to the specific module / PG.

Hyperlinks

Hyperlinks are used throughout this document. *Click* on a hyperlink to directly navigate to another topic in this guide, or to an external resource.

Key

The table below defines what colors are used to highlight specific sections in this document:

Color	Definition
	Highlight an off-system action
	Highlights the start / end of a step.
	Highlights the end of the process.

Part 1: What do I need to know? (O2C Getting Started)

High-level process

Part Description

This guide covers the general D365 tasks that every Order to Cash (O2C) user needs before starting process work: switching to the correct legal entity, adding pages to **Favorites**, creating and updating personalized views, and exporting grid data to Excel. These tasks are not steps in a business process. Each O2C process guide links to them and lists its own pages, columns and views: for AR Collections, see 230 Collections Part 1.

The steps come from the AR Training D365 sessions, where they were demonstrated on AR Collections pages. They apply to any D365 page that has the same controls.

Initiation

- A new O2C user is setting up D365 before starting routine process work.

Stream

Stream	Process Area	Key Roles
Order to Cash (O2C)	O2C Getting Started	• All O2C roles

Process

The high-level process is as follows:

#	Action	Who	When	Where
1	Switch Legal Entity with the Selector	O2C End-user	When work is needed in a legal entity other than the active one	D365
2	Switch Legal Entity Using the Ledger Code	O2C End-user	When the D365 ledger code is known and switching through the URL is appropriate	D365
3	Add Pages to Favorites	O2C End-user	When setting up D365, or when a page is used often	D365
4	Create a Personalized View	O2C End-user	When a page does not show the information needed	D365
5	Update a Saved View	O2C End-user	When a saved view needs a further change	D365
6	Export All Rows from a Grid	O2C End-user	When grid data is needed in Excel for internal analysis	D365; Excel
7	Remove a Page from Favorites	O2C End-user	When a page in your Favorites is no longer needed	D365

Roles and responsibilities

Overview

Every O2C user completes these tasks in their own D365 session.

Tasks / Business Roles	O2C End-user
Switch Legal Entity with the Selector	R
Switch Legal Entity Using the Ledger Code	R
Add Pages to Favorites	R
Create a Personalized View	R
Update a Saved View	R
Export All Rows from a Grid	R
Remove a Page from Favorites	R

*R = Responsible

Key concepts

Overview

Before you start, you need to know the **Navigation Pane** options, how legal entities are identified, what a view contains and what a grid export contains.

Navigation Pane options

Option	Description
Modules	Opens the list of D365 modules, such as **Credit and collections** and **Accounts receivable**. Clicking a module opens its module menu.
Favorites	Lists the pages you have added as favorites. Click a page in the list to open it.

Legal entities

Term	Description
Legal entity	A company set up in D365. The pages you open show data for the active legal entity, so you must work in the legal entity that holds the customer accounts you need.
Business name	The name of the business a legal entity represents. Use the business name to identify the legal entity you need.
Ledger code	The code D365 uses for a legal entity. D365 ledger codes differ from CargoWise ledger codes.

Working in the correct legal entity

Rule	Description
Work with business names	Identify legal entities by their business names rather than their ledger codes.
Confirm before processing	Confirm the active legal entity before you perform any transaction.

What a view contains

Term	Description
View	A saved layout for a page: the columns shown and their order, any filters and any footer totals.
Default view	The view you pin as the default for a page.
View scope	Views are set up separately for each page. Set up a view on each page you use.

Filter operators

The operators you can select depend on the type of column you filter.

Text columns

Operator	Use
is exactly	Matches the value exactly, for example customer account 112A.
is not	Excludes the exact value.
contains	Matches any value that includes the text you type.
does not contain	Excludes values that include the text.
begins with	Matches values that start with the text.
ends with	Matches values that end with the text.
is one of	Matches any of several values. Separate the values with commas.
matches	Matches a pattern with wildcards: an asterisk (*) for any characters and a question mark (?) for a single character.

Number and amount columns

Operator	Use
equals / does not equal	An exact amount, or every amount except one. For example, a balance that does not equal **0** excludes zero-balance accounts.
greater than / less than	Values above or below a threshold, such as overdue balances.
between	A range from one value to another.
is one of	A list of specific values.

Date columns

Operator	Use
is / is not	A specific date, or every date except one.
before / after	Dates earlier or later than a given date, such as due dates.

Operator	Use
between	A date range.

Grid exports

Term	Description
Export all rows	An option on the grid header that exports the grid's rows to an Excel file.
Configured columns	The export contains the columns configured on the grid. Add any column you need before you export.
Export volume	Limits apply to how much data can be exported. The limits for your environment are pending confirmation.

Using exported data

Rule	Description
Internal analysis only	Use exported data for internal analysis. Customer-facing invoices and account documents use the approved PDF output. Do not send a customer an Excel export.
Exported customer data	Exported files can contain customer information. Store and share them according to the approved data handling rules.

Part 2: How do I do it? (O2C Getting Started)

1. Switch Legal Entity with the Selector

Description

Use this procedure to switch to another legal entity with the legal entity selector in the D365 header. You find the legal entity by its business name, select it and confirm that it is active.

Responsibility

- O2C End-user: works in the legal entity required for the task.

Initiation

- An O2C user needs to work in a legal entity other than the one that is active.

Procedure

Complete these steps to switch legal entity with the selector:

Action	Description
PROCESS START	*Pre-requisites:* • Access to D365 and to the required legal entity. • The business name of the required legal entity. *Responsibility:* • O2C End-user
1. *Click* the legal entity selector.	In the D365 header (top-right), click the legal entity selector. It shows the active legal entity.
2. *Find* the required legal entity.	Find the legal entity by its business name.
3. *Select* the legal entity.	Select the legal entity. D365 switches to it.
4. *Confirm* the active legal entity.	Check that the selector now shows the required legal entity before you continue. The ledger code after **cmp=** in the browser address bar also changes to the code of the selected legal entity (see Switch Legal Entity Using the Ledger Code).
PROCESS COMPLETE	*Outcomes:* • D365 is working in the required legal entity.

2. Switch Legal Entity Using the Ledger Code

Description

Use this procedure to switch legal entity by changing the ledger code in the D365 URL. You replace the ledger code in the browser address bar and confirm that the required legal entity is active.

Responsibility

- O2C End-user: works in the legal entity required for the task.

Initiation

- The D365 ledger code of the required legal entity is known, and switching through the URL is appropriate.

Procedure

Complete these steps to switch legal entity using the ledger code:

Action	Description
PROCESS START	*Pre-requisites:* • Access to D365 and to the required legal entity. • The D365 ledger code of the required legal entity. *Responsibility:* • O2C End-user
1. *Click* the browser address bar.	Click the address bar to edit the D365 URL.
2. *Find* the ledger code in the URL.	In the address bar, find **cmp=** in the URL. The code after it is the ledger code of the active legal entity. For example: https://wtg.operations.dynamics.com/?cmp=**112a**&mi=LedgerJournalTable_CustPaym Here the ledger code is **112a**.
3. *Enter* the required ledger code.	Replace the code after **cmp=** with the D365 ledger code of the required legal entity. Do not use the CargoWise code.
4. *Press* **Enter**.	Press **Enter** to open D365 in the required legal entity.
5. *Confirm* the active legal entity.	Check that the legal entity selector (top-right) shows the required legal entity before you continue.
PROCESS COMPLETE	*Outcomes:* • D365 is working in the required legal entity.

3. Add Pages to Favorites

Description

Use this procedure to add a D365 page to your **Favorites**, so that it opens directly from **Favorites** in the **Navigation Pane** instead of through the module menus. You find the page in its module menu, click its favorite star and check that it appears under **Favorites**. Each process guide lists the pages its users add: for AR Collections, see 230 Collections Part 1.

Responsibility

- O2C End-user: adds the pages they use to their own Favorites.

Initiation

- A new O2C user is setting up D365, or a page is used often.

Procedure

Complete these steps to add a page to your Favorites:

Action	Description
PROCESS START	*Pre-requisites:* • Access to D365 and to the module that contains the page. • The **Navigation Pane** is visible. *Responsibility:* • O2C End-user
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right). To change it, see Switch Legal Entity with the Selector.
2. *Click* **Modules**.	From the left-hand **Navigation Pane**, click **Modules**.
3. *Click* the module that contains the page.	From the list of modules, click the module, for example **Credit and collections** or **Accounts receivable**. The module menu opens.
4. *Click* the favorite star for the page.	In the module menu, find the page and click its favorite star. The page is added to your **Favorites**. To add another page, repeat steps 2 to 4.
5. *Click* **Favorites**.	From the left-hand **Navigation Pane**, click **Favorites**. Your favorites list is displayed.
6. *Confirm* the page is listed.	Confirm that the page appears in your favorites list. If a module or page is not available to you, log a request through the D365 issue form (see **Additional Resources**).
7. *Click* the page in your favorites list.	The page opens.
PROCESS COMPLETE	*Outcomes:* • The page appears under **Favorites** in the **Navigation Pane**. • The page opens from **Favorites**.

Note: To remove a page from your **Favorites**, see Remove a Page from Favorites.

4. Create a Personalized View

Description

Use this topic to set up a page so that it shows the information you need for your work, then save that layout as a named view and pin it as your default. You arrange the columns, optionally filter the rows and add a footer total, and then save the view. Views are set up separately for each page, so repeat this topic for each page you use.

Responsibility

- O2C End-user: creates views for the pages they use.

Initiation

- A page does not show the information needed for your work, such as due dates, currencies or overdue balances.

Topic Overview

This topic includes these steps:

Step	Description
Arrange the Columns	Add the columns you need, remove the ones you do not and reorder them so the most important information appears first. Output: the grid shows the columns you need, in your chosen order.
Filter the List	Optional. Limit the rows shown by filtering on a column value, for example to exclude zero balances or to include only certain customers. Output: the grid shows only the rows you need.
Add a Footer Total	Optional. Turn on the grid footer and add a sum to a column, such as an amount or balance column, so you can see the total at a glance. Output: the footer shows the total for the column.
Save and Pin the View	Save the layout as a named view and pin it as your default, so the page opens with your columns, filters and totals each time you use it. Output: a saved default view for the page.

4.1 Arrange the Columns

Procedure

Complete these steps to show the columns you need, in the order you need:

Action	Description
PROCESS START	*Pre-requisites:* • Access to D365 and to the page you want to personalize. *Responsibility:* • O2C End-user
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Open* the page you want to personalize.	Open the page whose layout you want to save, for example a page in your **Favorites**.
3. *Click* **Insert columns**.	Use **Insert columns** to add columns that the grid does not currently show.
4. *Select* the columns to add.	Select each column you need for your work. Each process guide lists the columns recommended for its pages: for AR Collections, see 230 Collections Part 1.
5. *Confirm* the selected columns are added to the grid.	Check that each selected column now appears in the grid.
6. *Remove* each column you do not need.	Remove columns that are not needed for your work, so the grid stays readable.
7. *Move* the columns into the order you need.	Reposition the columns so the information you check first appears first.
STEP COMPLETE	• *The grid shows the columns you need, in your chosen order.* • *Continue to Filter the List*

4.2 Filter the List

Procedure

This subprocedure is optional. Complete it when the view should show only some rows. Otherwise, continue to Add a Footer Total.

Complete these steps to show only the rows you need:

Action	Description
PROCESS START	*Pre-requisites:* • The grid shows the columns you need (see Arrange the Columns). *Responsibility:* • O2C End-user
1. *Open* the filter for the column.	Open the filter for the column whose values you want to limit.
2. *Select* the filter operator.	Select the operator that matches the rows you want, for example **does not equal** to exclude a value or **is one of** to include several values. The operators depend on the column type: see **Filter operators** in Key concepts for the full list.
3. *Enter* the filter value.	Enter the value or values for the operator. For example, to exclude zero balances, use **does not equal** with the value **0**.
4. *Confirm* only the required rows are displayed.	Check that the grid shows only the rows that match the filter.
STEP COMPLETE	• *The grid shows only the rows you need.* • *Continue to Add a Footer Total*

© 2026 WiseTech Global

4.3 Add a Footer Total

Procedure

This subprocedure is optional. Complete it when the view should show a total for a column. Otherwise, continue to Save and Pin the View.

Complete these steps to show a column total in the grid footer:

Action	Description
PROCESS START	*Pre-requisites:* • The grid shows the columns you need (see Arrange the Columns). *Responsibility:* • O2C End-user
1. *Show* the grid footer.	Turn on the footer for the grid.
2. *Add* a **Sum** to the column.	Hover over the footer under the column you want totaled, such as an amount or balance column, until a **+** symbol appears. Click **+** to calculate the total for the column.
3. *Confirm* the total is displayed.	Check that the footer shows the total for the column.
STEP COMPLETE	• *The footer shows the total for the column.* • *Continue to Save and Pin the View*

4.4 Save and Pin the View

Procedure

Complete these steps to save the layout as a named view and pin it as your default:

Action	Description
PROCESS START	*Pre-requisites:* • The grid shows the columns, and any filters and totals, you need (see Arrange the Columns). *Responsibility:* • O2C End-user
1. *Click* the view name.	At the top of the page, click the view name beside the page title to open the view selector. If you have never saved a view, the view name is **My view**. An asterisk (*) after the view name shows that the page has changes you can save.
2. *Click* **Save as**.	In the view selector, click **Save as** to save the current layout as a new view.
3. *Enter* the view name.	Enter a name that identifies the page and the purpose of the view.
4. *Save* the new view.	Save the view with the name you entered.
5. *Select* **Pin as default**.	Pin the view as your default for this page.
6. *Set* the default for all legal entities.	Optional. To make the view your default in every legal entity, not only the active one, select the option to set it as the default view across all legal entities.
7. *Confirm* the view is saved and pinned.	Check that your view is listed in the view selector and is set as the default for this page. If you set it for all legal entities, it is also your default after you switch legal entity.
PROCESS COMPLETE	*Outcomes:* • The page has a saved view with the columns, filters and totals you set. • The view is pinned as your default for this page.

5. Update a Saved View

Description

Use this procedure when a saved view needs a further change, such as an added column, a changed filter or a new total. You select the saved view, make the change and save it, so the view keeps the change the next time you use it.

Responsibility

- O2C End-user: maintains the views they have saved.

Initiation

- A saved view needs a further change.

Procedure

Complete these steps to update a saved view:

Action	Description
PROCESS START	*Pre-requisites:* • A saved view for the page (see Create a Personalized View). *Responsibility:* • O2C End-user
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Open* the page that has the saved view.	Open the page whose view you want to change.
3. *Select* the saved view.	Click the view name beside the page title to open the view selector, then select the view you want to change.
4. *Make* the change to the layout.	Change the columns, filters or totals as described in Create a Personalized View.
5. *Click* **Save**.	In the view selector, click **Save** to save the change to the selected view. An asterisk (*) after the view name shows that the change is not saved yet.
6. *Confirm* the view shows the change.	Check that the selected view now includes the change.
PROCESS COMPLETE	*Outcomes:* • The saved view includes the change.

6. Export All Rows from a Grid

Description

Use this procedure to export the rows of a D365 grid to Excel for internal analysis. You prepare the grid columns, export all rows from the grid header and check the exported file.

Responsibility

- O2C End-user: exports grid data for internal analysis.

Initiation

- An O2C user needs D365 grid data in Excel for internal analysis.

Procedure

Complete these steps to export all rows from a grid:

Action	Description
PROCESS START	*Pre-requisites:* • Access to D365 and to the page that holds the data. *Responsibility:* • O2C End-user
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Open* the page that holds the data.	Open the D365 page whose grid holds the data you need, for example **Aged balances** from your **Favorites**.
3. *Confirm* the grid shows the columns you need.	The export contains the columns configured on the grid. If a column is missing, add it with **Insert columns** (see Arrange the Columns).
4. *Right-click* the grid header.	Right-click the header of any column in the grid.
5. *Select* **Export all rows**.	Select **Export all rows** from the menu.
6. *Download* the export.	Download the exported file when D365 has prepared it.
7. *Open* the exported file.	Open the downloaded file in Excel.
8. *Confirm* the required fields were exported.	Check that the file includes every field you need for your analysis.
PROCESS COMPLETE	*Outcomes:* • The grid rows are exported to an Excel file with the configured columns. • The file is used for internal analysis only.

© 2026 WiseTech Global

7. Remove a Page from Favorites

Description

Use this procedure to remove a page you no longer need from your **Favorites**. You open your favorites list, click the page's filled favorite star and check that the page is no longer listed. Removing a favorite does not change your access to the page: it still opens from its module menu.

Responsibility

- O2C End-user: removes pages they no longer need from their own Favorites.

Initiation

- A page in your Favorites is no longer needed.

Procedure

Complete these steps to remove a page from your Favorites:

Action	Description
PROCESS START	*Pre-requisites:* • Access to D365. • The page is in your **Favorites**. *Responsibility:* • O2C End-user
1. *Check* the **Entity**.	Confirm you are signed into the correct **Legal Entity** (top-right).
2. *Click* **Favorites**.	From the left-hand **Navigation Pane**, click **Favorites**. Your favorites list is displayed.
3. *Click* the favorite star for the page.	In your favorites list, find the page and click its filled favorite star. The page is removed from your **Favorites**. You can also click the filled star next to the page in its module menu.
4. *Confirm* the page is no longer listed.	Check that the page no longer appears in your favorites list.
PROCESS COMPLETE	*Outcomes:* • The page no longer appears under **Favorites** in the **Navigation Pane**. • The page still opens from its module menu.

Part 3: Reports (O2C Getting Started)

Overview

No reports apply to this guide. Each O2C process guide lists the reports for its process.

Additional Resources

User Support

- For any D365 issues during go-live and early adoption, log requests through the D365 issue form on the Atlas D365 User Support Hub. This is the fastest way to get help.

Self-Service Resources

- AVA - Atlas Virtual Assistant: Your AI assistant for navigating the Procedure Guides and quickly finding the right steps for any D365 task.
- Procedure Guides: Step-by-step instructions for core D365 processes.
- Atlas Training Hub: Access to training recordings, guides, quick reference material, and learning artifacts.
